Why should you take part?

Following the successful introduction of Heritage for the Future; East Midlands for the first time in 2023, we are bringing it back for 2024 to connect more organisations to the world of heritage.

As the sister event to Build for the Future, this is a great event to come along and find out how to get work within the heritage sector, how to get funding for your project and speak to heritage experts in a variety of fields.

We are working with the Heritage Trust Network again for the second year to bring exciting elements to this event including Meet the Funder, where we give you the opportunity to discuss funding with the National Lottery Heritage Fund and the Architectural Heritage Fund. Meeting and finding out how to work with Local authorities across the East Midlands and find out more about their regeneration projects, Town Deals and Heritage Action Zones; and heritage advice surgeries that include topics from tax to project management and architects to funding.

What is Heritage Lincolnshire?

Heritage Lincolnshire is a long established charitable organisation dedicated to preserving and developing historic buildings as well as engaging and benefitting the wider communities around them. We deliver a range of expert heritage consultancy services to the public and private sectors, communities and individuals throughout Lincolnshire and the wider East Midlands. Heritage Lincolnshire has a breadth of experience in developing successful funding bids for conservation projects, producing options appraisals and viability studies, in addition to providing effective and sustainable conservation plans. We also offer a range of services to enable you to engage and consult communities and the wider public, including activity statements and plans, national curriculum linked education and archaeology clubs for schools, as well as traditional building skills training. Our highly experienced project management team can provide you with bespoke support and services to fulfil the specific needs and requirements of your project.

What is Heritage Trust Network?

Heritage Trust Network is the UK's membership body for community organisations, charities and social enterprises that are saving, restoring and managing historic buildings, parks, gardens, structures and landscapes. We connect people so they can share experiences and best practice, learn from each other and provide mutual support. Our popular training events, conferences and 'Network Natters' are held regularly and we work closely with funders to bring the latest opportunities to our members.

The Network includes organisations specifically set up to save heritage sites, as well as community organisations that deliver other types of services but have found an ideal place to operate in a historic building or space. We also welcome individuals, businesses and local authorities that support local heritage action.

Please visit our stand to find out more about membership.
